There is more to data than just numbers. It holds untold stories, hidden insights, and pivotal choices. Each dataset carries its own unique narrative, shaped by how it was created, the domains it touches, and the stakeholders it serves. Adapting to its nuances becomes an engaging challenge, sparking creative ways to bring its story to life. For me, it's not just about hitting the initial target. It's about crafting richer, more meaningful results, presented in a way that truly resonates. This human-centered approach to data science is what enables me to understand the true implications within the data and translate them into actionable strategies.

Competencies

- Python
- SQL
- Power BI
- Hadoop
- Airflow
- Statistics
- Data Cleaning
- Data Analysis
- Data Visualization
- Machine Learning
- Business Acumen
- Storytelling
- Problem Solving
- Critical Thinking
- Lifelong Learning
- Collaborative Work

Experience

Home Credit Indonesia

Apr 2026 – Present
Jakarta Selatan

Sr. Data Scientist
- Facilitate knowledge transfer and bridge the gap between senior leadership and technical talent.
- Provide technical stability for the team during a period of organizational transition.
- Contribute technical efforts in data engineering and system migrations.
- Collaborate cross-functionally to align data architecture updates.

Oct 2025 – Mar 2026

Data Scientist
- Delivered critical ad-hoc analyses and strategic recommendations directly to senior leadership.
- Served as the primary point for the exploration and integration of credit bureau data.
- Bridged the gap between technical data workflows and business strategy.
- Contributed data-driven solutions to high-level planning discussions.

Jan 2024 – Sep 2025

Jr. Data Scientist
- Provide actionable insights through ad-hoc analyses to a wide range of stakeholders.
- Maintain collection segmentation models to improve performance and accuracy.
- Design and implement efficient ETL pipelines within the Hadoop ecosystem.
- Assess big data partnerships, ensuring optimal return on investment.

May 2021 – Dec 2023

Collection Analyst
- Developed segmentation models to promote precise and effective collection strategies.
- Assessed the costs, benefits, & risks of pilot projects to determine their feasibility.
- Built & maintained dashboards to evaluate models performance effectively.
- Resolved data issues to maintain the accuracy & reliability of reports.

Feb 2021 – May 2021
Jakarta Selatan

Data Science Fellowship, *IYKRA*
- Successfully completed various assignments and mini-projects.
- Gained hands-on experience in data mining techniques and machine learning algorithms.
- Designed and implemented a merchant segmentation model for BRI as a capstone project.

Oct 2018 – Dec 2019
Jakarta Timur

Sales Analyst, *Arista Group*
- Analyzed sales data to discover key trends and identify strategic improvement opportunities.
- Developed accurate forecasts to optimize inventory management and purchasing decisions.
- Conducted in-depth research on market dynamics and competitive landscape.
- Delivered insightful reports and presentations to executive leadership team.

Education

Aug 2009 – Oct 2014
Bandung

Bachelor of Geophysical Engineering, *Institut Teknologi Bandung*
GPA 3.12 of 4.00
